

Application Letter

Position Title: Frontend Developer
Location: Jalalabad, Nangarhar, Afghanistan

Dear Hiring Manager,

I am writing to express my keen interest in the announced position and to introduce myself as a suitable candidate for the role. My name is Ataullah Arabzai, and I can see all the qualifications, experience, and abilities in myself that you are looking for in a candidate. I love to continuously level up my experience so working with your team and organization will be a journey of full experience to me.

As a junior developer I don't have production level experience but throughout my career, I will consistently demonstrate a high level of responsibility, integrity, and commitment to achieve the company objectives. I am comfortable working both independently and as part of a team, and I firmly believe that my skills and experience make me an excellent match for the announced position. Additionally, I have impeccable personal and work references.

I am currently student in Sayed Jamaludin E Afghani University in Computer Science (BCS), I possess a wide range of skills and expertise, including websites & Web Applications designing and development (**HTML5, CSS3, Bootstrap, Tailwind CSS, JavaScript, TypeScript, React** and **other Web Development tools**), object-oriented programming, Git & GitHub, web services and teaching. As I am a continuous learner, my backend development journey is almost started with **PHP** and **Laravel**.

Thank you for considering my application. I look forward to the opportunity to discuss my candidacy in more detail.

Sincerely,

Ataullah ARABZAI
